

# 8<sup>th</sup> SYMPOSIUM

## Smart-Aging Research Center

### TOHOKU UNIVERSITY

“Life science research to realize healthy longevity”

**11/25 (Wed)**  
**17:00-17:40**

**“How does inhibition of mTOR promote longevity in mammals?”**

Takashi ITO

Research Scientist,  
RIKEN Center for  
Sustainable Resource  
Science

**12/3 (Thu)**  
**17:00-17:40**

**“Circulating factors regulate central nervous system regeneration.”**

Rieko MURAMATSU

Director,  
Department of  
Neuropharmacology,  
National Center of  
Neurology and  
Psychiatry

**12/10 (Thu)**  
**17:00-17:40**

**“Orchestrated induction of bioprotective effects by innate fear odors in mice.”**

Tomohiko MATSUO

Research Fellow,  
Dept. of Functional  
Neuro science,  
Kansai Medical  
University

**12/16 (Wed)**  
**17:00-17:40**

**“Host pathophysiology in cancer: from local to systemic.”**

Shinpei KAWAOKA

Associate Professor,  
Institute for Frontier  
Life  
and Medical Sciences  
Kyoto University

**12/23 (Wed)**  
**17:00-17:40**

**“Histone sensing: a new insight for aging research.”**

Tsuyoshi IKURA

Associate Professor,  
Laboratory of  
Chromatin  
Regulatory Network  
Dept. of Genome  
Biology,  
Kyoto University

Each lecture will be live-streamed by Zoom from 17:00 each day for 30 minutes online with 10 minutes Q & A. We are looking forward to your participation!
