

# 10<sup>th</sup> Symposium

Smart-Aging Research Center, Tohoku University

Expected and Possible Roles of Life Science for Smart Aging

**4/16(Fri) 17:00-17:50**

"Central regulation of aging and longevity through sleep control in mammals"

**Akiko Satoh**  
(National Center for Geriatrics and Gerontology)

**5/11(Tue) 17:00-17:50**

"Quality control of aberrant protein synthesis in neurological and mental disorders"

**Tsuyoshi Udagawa**  
(Graduate School of Pharmaceutical Sciences, Tohoku University)

**5/20(Thu) 17:00-17:50**

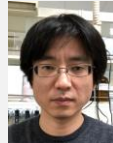

"Maternal epigenetic inheritance by polycomb repressive complexes"

**Azusa Inoue**  
(RIKEN Integrative Medical Sciences)

**5/26(Wed) 17:00-17:50**

"Protein Geranylgeranylation and Longevity"

**Ryutaro Shirakawa**  
(Institute of Development, Aging and Cancer, Tohoku University)

**5/31(Mon) 17:00-17:50**

"The bone marrow at the crossroads of inflammation and malignant haematopoiesis"

**Kyohei Nakamura**  
(QIMR Berghofer Medical Research Institute)

To be held on **ZOOM**
